HOW DO I CREATE A PHP FILE?

READ THIS

Install XAMPP or WAMP server

Links

XAMPP: https://www.apachefriends.org

WAMP: https://www.wampserver.com/en/ if you don't understand French or the respective language then; you can install from cnet or sourceforge or getintopc

Now read the instructions after installations

CLEAR THE 'WWW' from WAMP if wamp else CLEAR THE 'htdocs/dashboard' from xampp

Paste your php files there

Finished
